BRAND GUIDELINES · VERSION 2.0 · 2026

Signals with a strategy.

The identity system for Tunisia Crypto Signals: the Discord community that helps Tunisians learn crypto, trade with a plan and stay clear of scams.

BRAND	MARKET	CHANNELS
TUNISIA CRYPTO SIGNALS	TUNISIA · MENA	DISCORD · SOCIAL · WEB

01

The brand

Most crypto “signal” groups sell hype. We built the opposite: a community where every call comes with an entry, a target, a stop and the reasoning behind it, priced so that any Tunisian can afford to learn.

We help Tunisians understand the market before they trade it.

Mission

Give Tunisians affordable, transparent trading signals and the education to use them, so they can protect their capital, avoid scams and grow with confidence.

Vision

Become the most trusted crypto resource in Tunisia: a lasting platform where beginners and experienced traders learn, share and navigate digital assets together.

VALUE · 1

Strategy

Every signal is a plan: entry zone, targets, stop loss and risk. The king piece in our mark stands for this.

VALUE · 2

Transparency

We publish wins and losses alike. Results are tracked in public channels, never cherry-picked.

VALUE · 3

Education

We explain the why behind each call, so members become traders rather than followers.

VALUE · 4

Community

Tunisians helping Tunisians, in Arabic, French and English. Supportive, never elitist.

Who we talk to

Two audiences, one tone: clear enough for the first trade, precise enough for the hundredth.

NEWCOMERS	18–30, curious about crypto, burned or nearly burned by a “guaranteed profit” group. Need trust and plain language.
ACTIVE TRADERS	Already trading spot or futures. Want clean, fast, well-reasoned setups and a serious community.
LANGUAGES	English for brand assets · French and Tunisian Arabic in community content · Modern Standard Arabic for formal material.

02

Logo

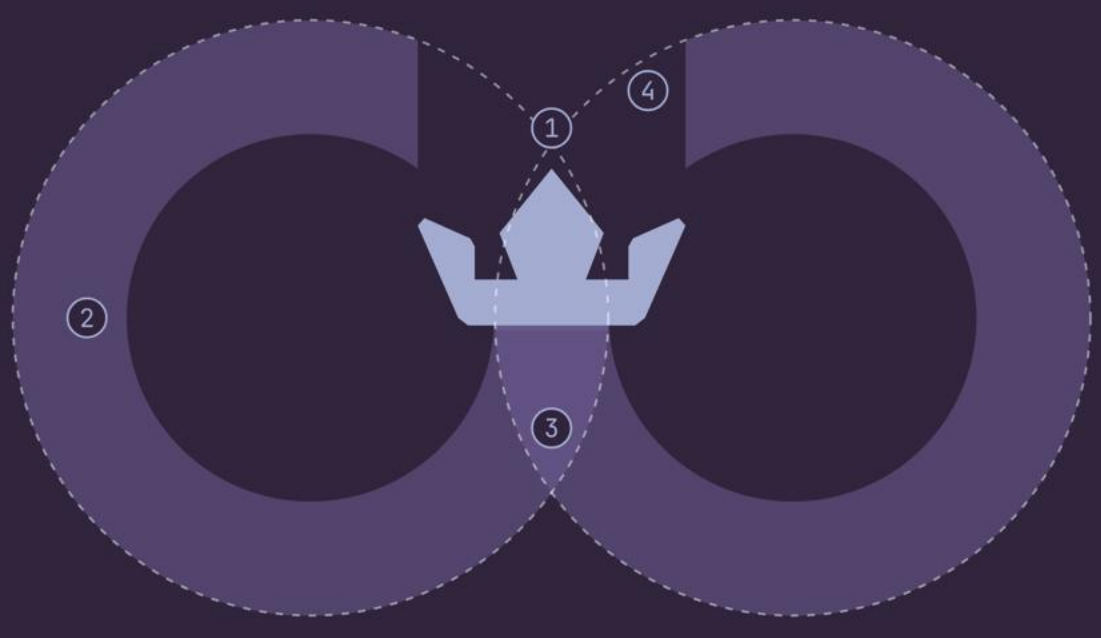

Two mirrored C's, for Crypto and Signals, meet in a single stem crowned by the chess king. Read together, the form also suggests an infinity loop: markets cycle, strategy endures.

PRIMARY LOCKUP · HORIZONTAL

Tunisia
Crypto Signals

Anatomy

Each part of the mark carries meaning. Use these descriptions when presenting the brand.

1 King piece

Strategy and leadership. Smart guidance for moving through the market.

2 Mirrored C's

The cyclical market. Adapting to trends instead of fighting them.

3 Shared stem

Crypto and Signals joined into one: information that works together.

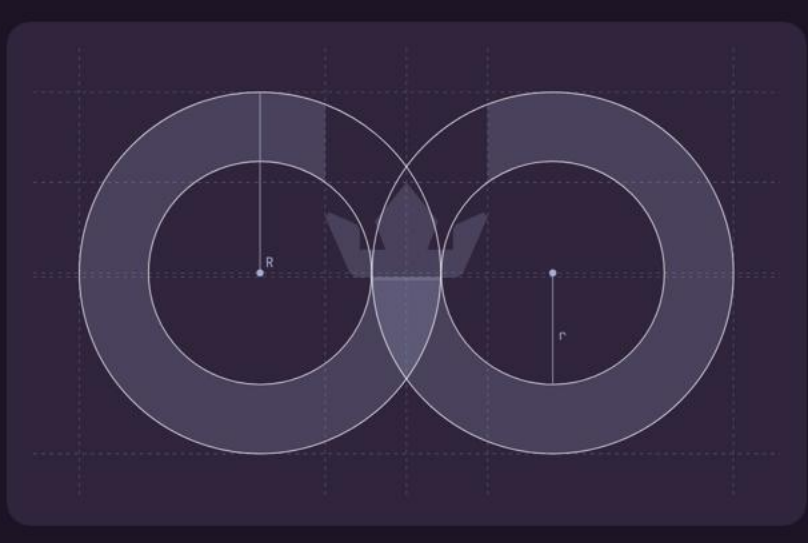

4 Open gateway

The cut in each C: an opening to opportunity, held with precision.

Construction

The mark is built from two identical rings. Each ring's stroke equals 38% of its outer radius, and the rings sit exactly one stroke-width apart so their inner edges share the central stem. The C openings align with the crown's outer arm tips.

OUTER RADIUS	R = 1.00
INNER RADIUS	r = 0.62 R
RING OFFSET	R + r = 1.62 R
PROPORTIONS	1.81 : 1 (w : h)

Logo family

Four versions, each with a job. Start with the primary lockup; step down only when space or context requires it.

Primary · horizontal

Default for website headers, documents, presentations and stationery.

Stacked

For square and vertical formats: roll-ups, posters, merch and social covers.

Mark

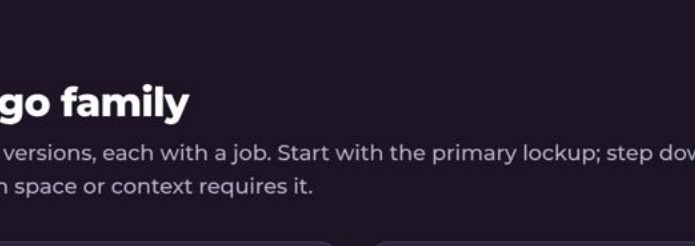

Avatars, app icon, favicon and any space under 120 px wide. Use once the name is known.

Seal

A secondary badge for stickers, certificates, Academy material and verified posts.

Clear space

Keep a margin equal to the height of the crown (**x**) on every side. Nothing enters this zone: no text, no edges, no other logos.

Minimum size

Below these sizes the crown fills in. Switch to the mark alone, which holds up to 16 px as a favicon.

Tunisia Crypto Signals	Lockup 32 px tall · 25 mm print
	Mark 24 px tall · 8 mm print
	Favicon 16 px · solid Mist, no gradient

Approved colorways

The gradient mark is reserved for dark backgrounds. On light or busy surfaces, switch to a solid version.

PRIMARY · ON NIGHT

MIST · ON ROYAL

ROYAL · ON WHITE

ROYAL · ON MIST

REVERSED · SINGLE COLOR

BLACK · SINGLE COLOR

Misuse

The logo is a fixed artwork. Never redraw, recolor or decorate it.

01 Don't stretch or squash

02 Don't rotate

03 Don't recolor

04 Don't add shadows or effects

05 Don't outline

06 Don't change the typeface

07 Don't lower the opacity

08 Don't place on busy, low-contrast art

03

Color

A night-time palette: calm, premium and readable on screens, where our members spend their trading hours. Purples carry the brand. Two signal colors carry market meaning, and only market meaning.

Night

Base surface

HEX #31253D
RGB 49 37 61
CMYK 20 39 0 76

Royal

Brand field · emphasis

HEX #46225F
RGB 70 34 95
CMYK 26 64 0 63

Amethyst

Graphics · gradient start

HEX #705F96
RGB 112 95 150
CMYK 25 37 0 41

Mist

Primary on dark · logo

HEX #A4ACD1
RGB 164 172 209
CMYK 22 18 0 18

Signature gradient

Amethyst → Mist, left to right, 0°

Use on the mark and on one hero element per layout. Never on text or body backgrounds.

Long

Buy · target hit

HEX #4FD1A5

Short

Sell · stop loss

HEX #FF6B81

Proportion

A typical layout is mostly Night, with Royal for brand moments and Mist for type and the logo. Signal colors stay under 5% and only appear next to market data.

Accessible pairs

Contrast ratios to WCAG 2.2. Amethyst never carries text; it sits at 2.6 : 1 on Night.

Mist 6.4

Aa
Royal 5.6

Aa
Royal 13.3

04

Typography

Montserrat speaks for the brand. JetBrains Mono handles every price, percentage and ticker so numbers align and never jump. Tajawal carries Arabic with the same geometric spirit.

PRIMARY · MONTSERRAT

Aa

How to set a stop loss

Body
16 / 1.6 · 500

A stop loss is the price where you accept the idea was wrong. Every signal we publish includes one, so you always know the maximum you can lose before you enter.

Label
12 · Mono · +12%

SIGNAL #128 · SPOT · 4H

DATA · JETBRAINS MONO

61,480.20 +4.82%

Tabular figures keep columns of prices aligned in signal cards, tables and charts. Use for prices, percentages, tickers, timestamps and IDs, never for sentences.

ARABIC · TAJAWAL

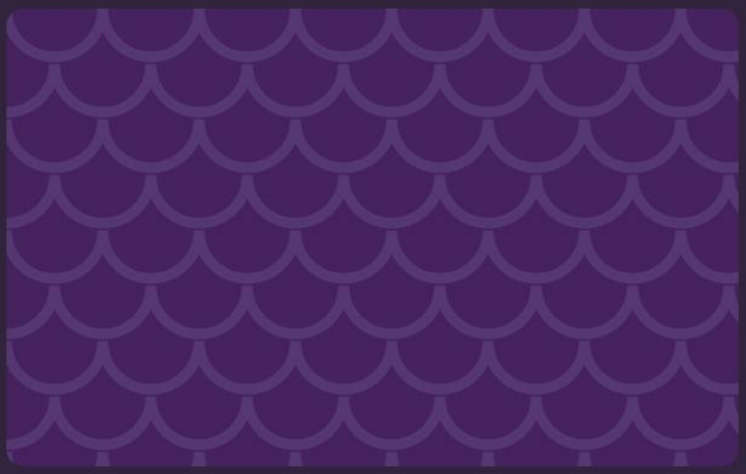

تداوَل بخطة، لا بالعاطفة.

“Trade with a plan, not with emotion.” Pair Tajawal 800 with Montserrat 800 at the same cap height when content runs bilingual. Mirror layouts for right-to-left.

05

Graphic elements

A small kit, all derived from the mark: the ring pattern, the Crown Marker for charts, the signal card and a line-icon set. Together they make any post recognisably ours, even without the logo.

Ring pattern

Built from the lower arcs of the two C's, repeated in offset rows. Use at 8–18% opacity behind content, in Mist on Night or Royal. Never behind body text at full strength.

Crown Marker

Our chart signature. The crown pins the entry point; dashed green lines mark targets, red marks the stop, and the entry zone is a soft Mist band. Price lines are always Mist, 3 px.

Signal card

The brand's most-seen asset. Every call follows the same structure, in the same order, with the risk note on every card. Consistency is what makes members trust the format.

ORDER	Pair · direction · entry · targets · stop · risk
NUMBERS	JetBrains Mono, thousands separated, no rounding
STATUS	Open · TP1 hit · Closed · Stopped
FOOTER	Risk note, always present

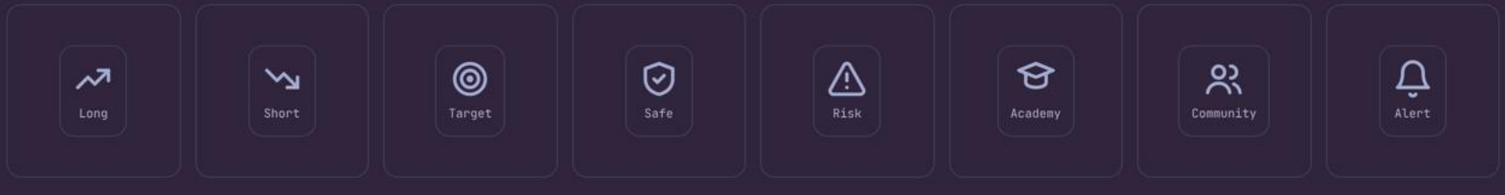

BTC / USDT ▲ LONG

Entry zone	61,200 - 61,800
TP1	62,900
TP2	64,300
TP3	66,000
Stop loss	59,950
Risk : reward	1 : 2.4
Position risk	1–2% of capital

#128 · Spot · 4H · Example — Not financial advice

Iconography

2 px rounded strokes on a 24 px grid, in Mist. Outline only, no fills, no color except signal states.

06

Voice

We sound like a calm, experienced friend who trades: direct, honest about risk, never selling a dream. Trust is the product, so every sentence has to earn it.

Calm	Hyped
Plain	Technical
Warm	Formal
Honest	Promotional
Local	Global

Taglines

Signals with a strategy. PRIMARY

Trade with a plan.

Learn first. Then trade.

تداوَل بخطة.

✓ WE SAY

- “ETH long setup. Entry 3,180–3,220, stop 3,090. Risk 1% of your account.”
- “TP1 hit. Move your stop to entry and let the rest run.”
- “This one stopped out at −1.2R. Here is what we missed.”
- “New to futures? Start with the Academy before trading leverage.”

× WE NEVER SAY

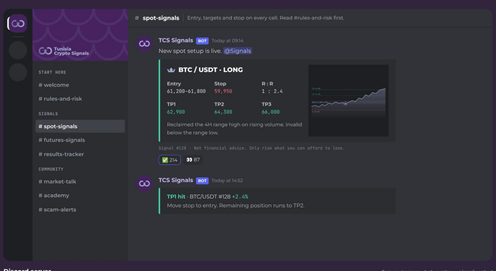

- “GUARANTEED 10x!!! Don’t miss this 🚀🚀🚀”
- “Easy money, no experience needed.”
- “Only 3 VIP spots left, pay now.”
- “We never lose.”

The risk line is part of the brand

Every signal, ad and results post carries this line, set in Mono at label size: **`“Not financial advice. Crypto is volatile. Only risk what you can afford to lose.”`** It protects members and it is the clearest proof that we are not another hype group.

Applications

The system in use, from the Discord server where the community lives to print, outdoor and signage. Contact details, handles and prices are examples; replace them with live information before production.
