

Rectify®

LEARN. LAUGH. LOOK CLOSER.

2026

Rectify ®

Rectify is a learning platform that brings education and entertainment together. Short videos and playful activities help kids explore **math, language and science**, at their own pace, with a friend who wears glasses.

CLIENT	INDUSTRY	SCOPE	YEAR
Rectify	EdTech · Kids 6–12	Identity · Product · Campaign	2026

Every kid is already curious. Rectify helps them look closer.

01

See clearly

Big ideas, made simple enough for a six-year-old and solid enough for their teacher.

02

Play seriously

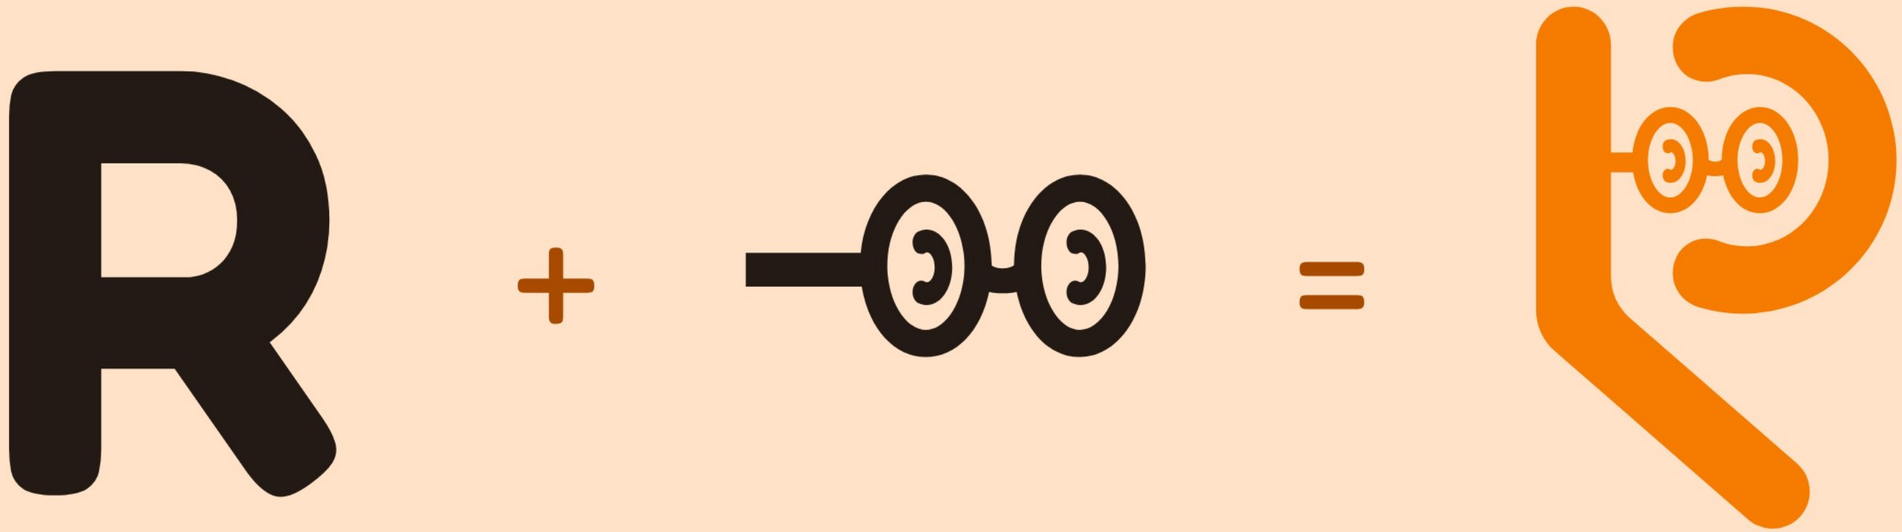

Fun is how we teach, not the reward at the end.

03

Grow together

Kids, parents and teachers looking at the same progress.

To *rectify* is to make something right. Our R puts on its glasses and takes a closer look.

A

The letter R

B

A pair of glasses

C

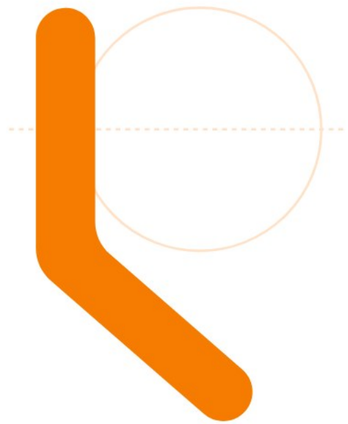

A curious learner

LOGO CONSTRUCTION

Five strokes to a face.

The symbol is built in the order a child would draw it. Every part keeps one stroke weight and round ends.

STEP 1

Stem

One rounded stroke: the spine of an R that leans forward, like a kid walking into class.

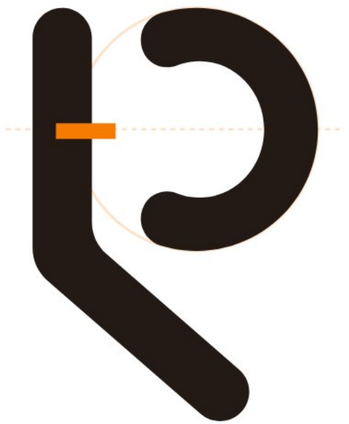

STEP 2

Bowl

The bowl is a 4x circle, opened on the left so the R breathes.

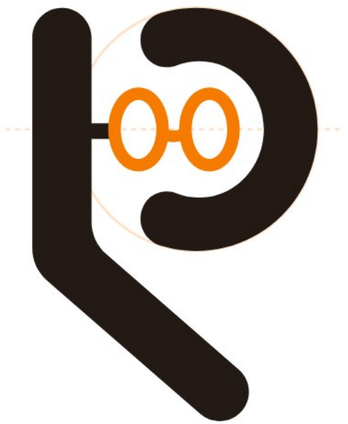

STEP 3

Bridge

A short bar joins stem and bowl: the arm of a pair of glasses.

STEP 4

Lenses

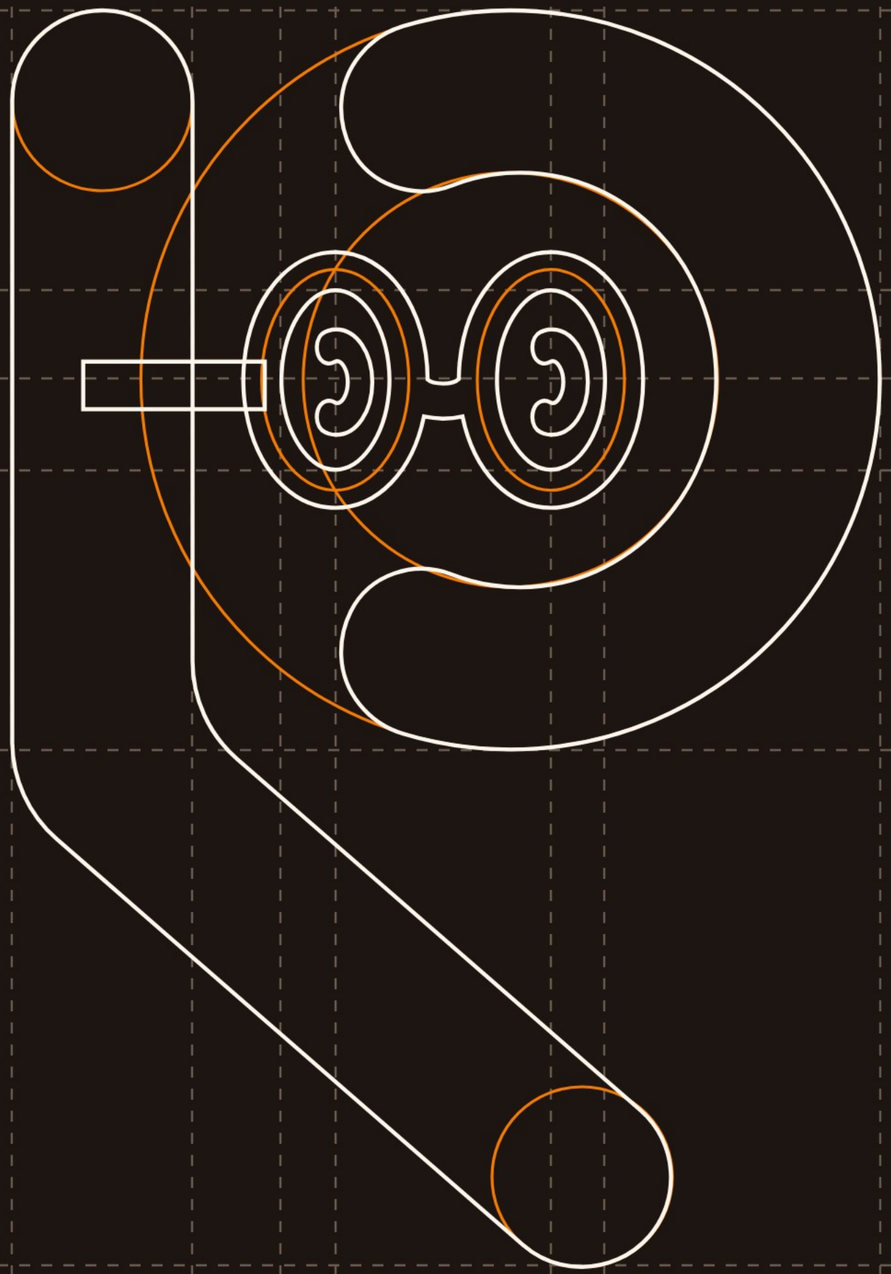

Two lenses share the bowl's centre line. The R now wears glasses.

STEP 5 FINAL

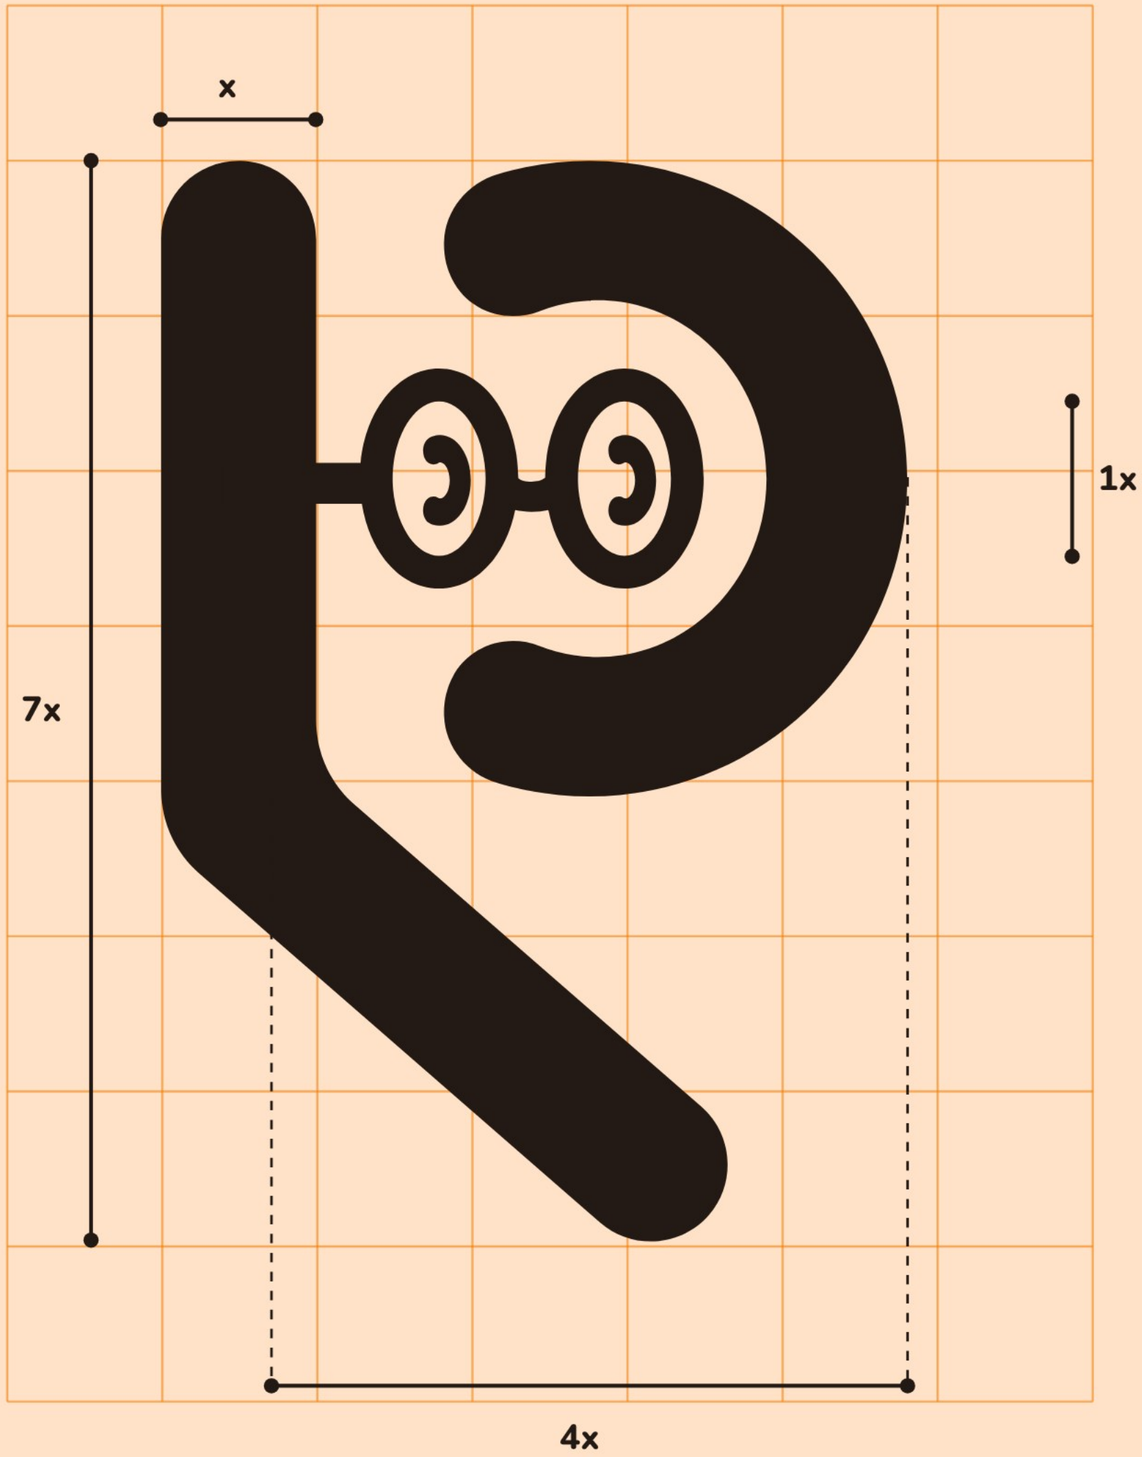

Spark

Spiral pupils give it a look: the moment an idea clicks.

One stroke width, round terminals, and two lenses sharing the bowl's centre. Geometry keeps it calm; the eyes keep it alive.

PROPORTIONS

Built on one unit.

x	Stem width. The unit for everything.
7x	Total height of the symbol.
4x	Bowl diameter.
1x × 0.6x	Each lens opening.
41°	Leg angle, leaning forward.

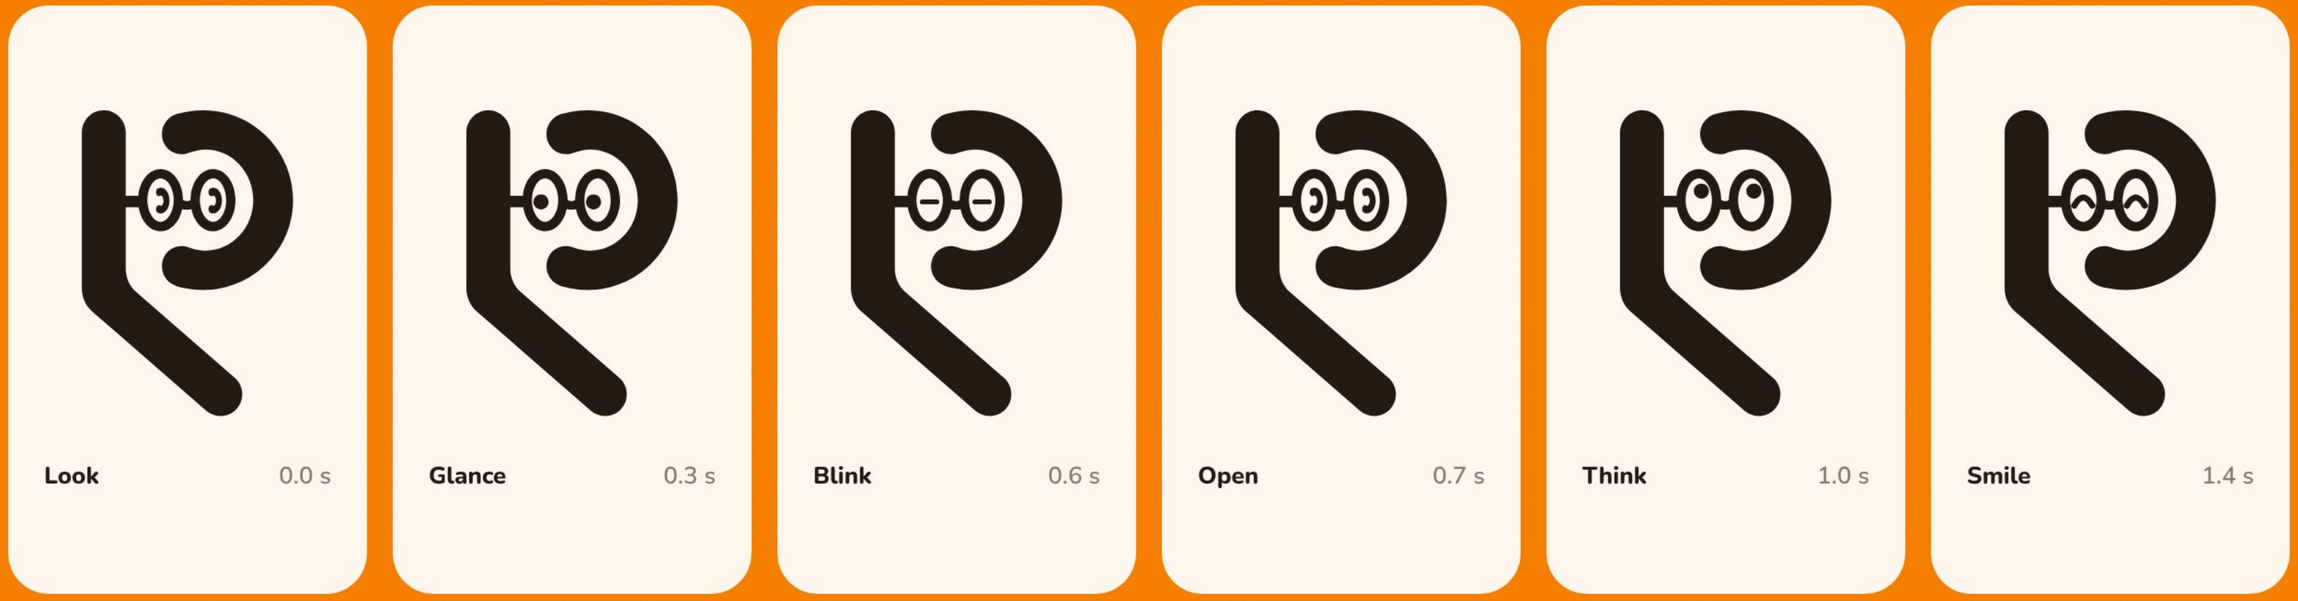

Rectify®

Rounded terminals and open counters. Lettering built to be read by a six-year-old and trusted by their parents.

LOGO IN MOTION

The logo blinks.

A 1.4-second sequence for the app loader, video intros and end cards. Only the pupils move; the R never changes shape.

LOOK CLOSER

APP ICON

06 — NEW: MASCOT

Meet Specs.

The symbol already has eyes, so we let them move. Specs reacts to every answer in the app, so feedback feels like a friend cheering you on, not a grade.

Look closer.

A signature frame cut from the logo’s glasses. Any photo dropped inside becomes a pair of lenses: a reminder to look closer.

PHOTOGRAPHY

Real kids, really curious.

Photography shows learning as it actually happens: messy, focused and joyful. Four rules keep every shoot on brand.

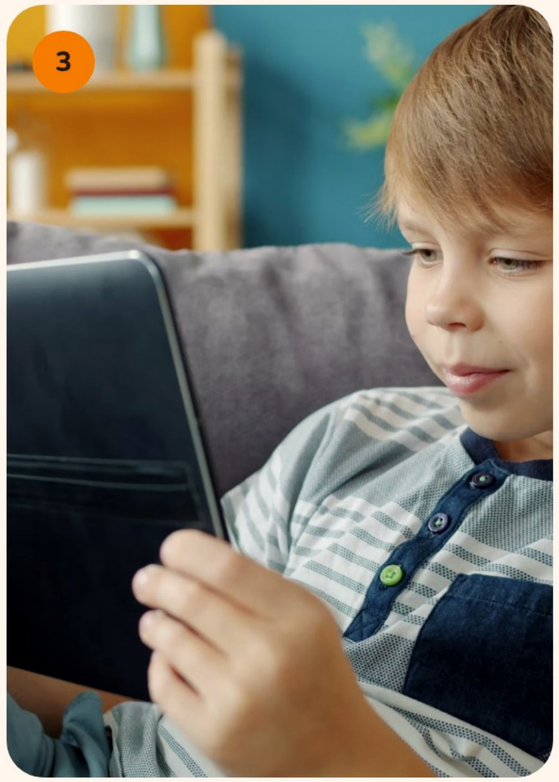

At their eye level

Shoot from a child's height. The world should look the size it feels to them.

Mid-discovery

Hands busy, eyes on the thing. Catch the moment, never the pose.

Warm light, one orange note

Daylight, soft shadows and one warm accent in the frame: a cushion, a wall, a sleeve.

Close enough to see

Get near: eyes, hands, pages. Leave room for the Lens and a headline.

AVOID

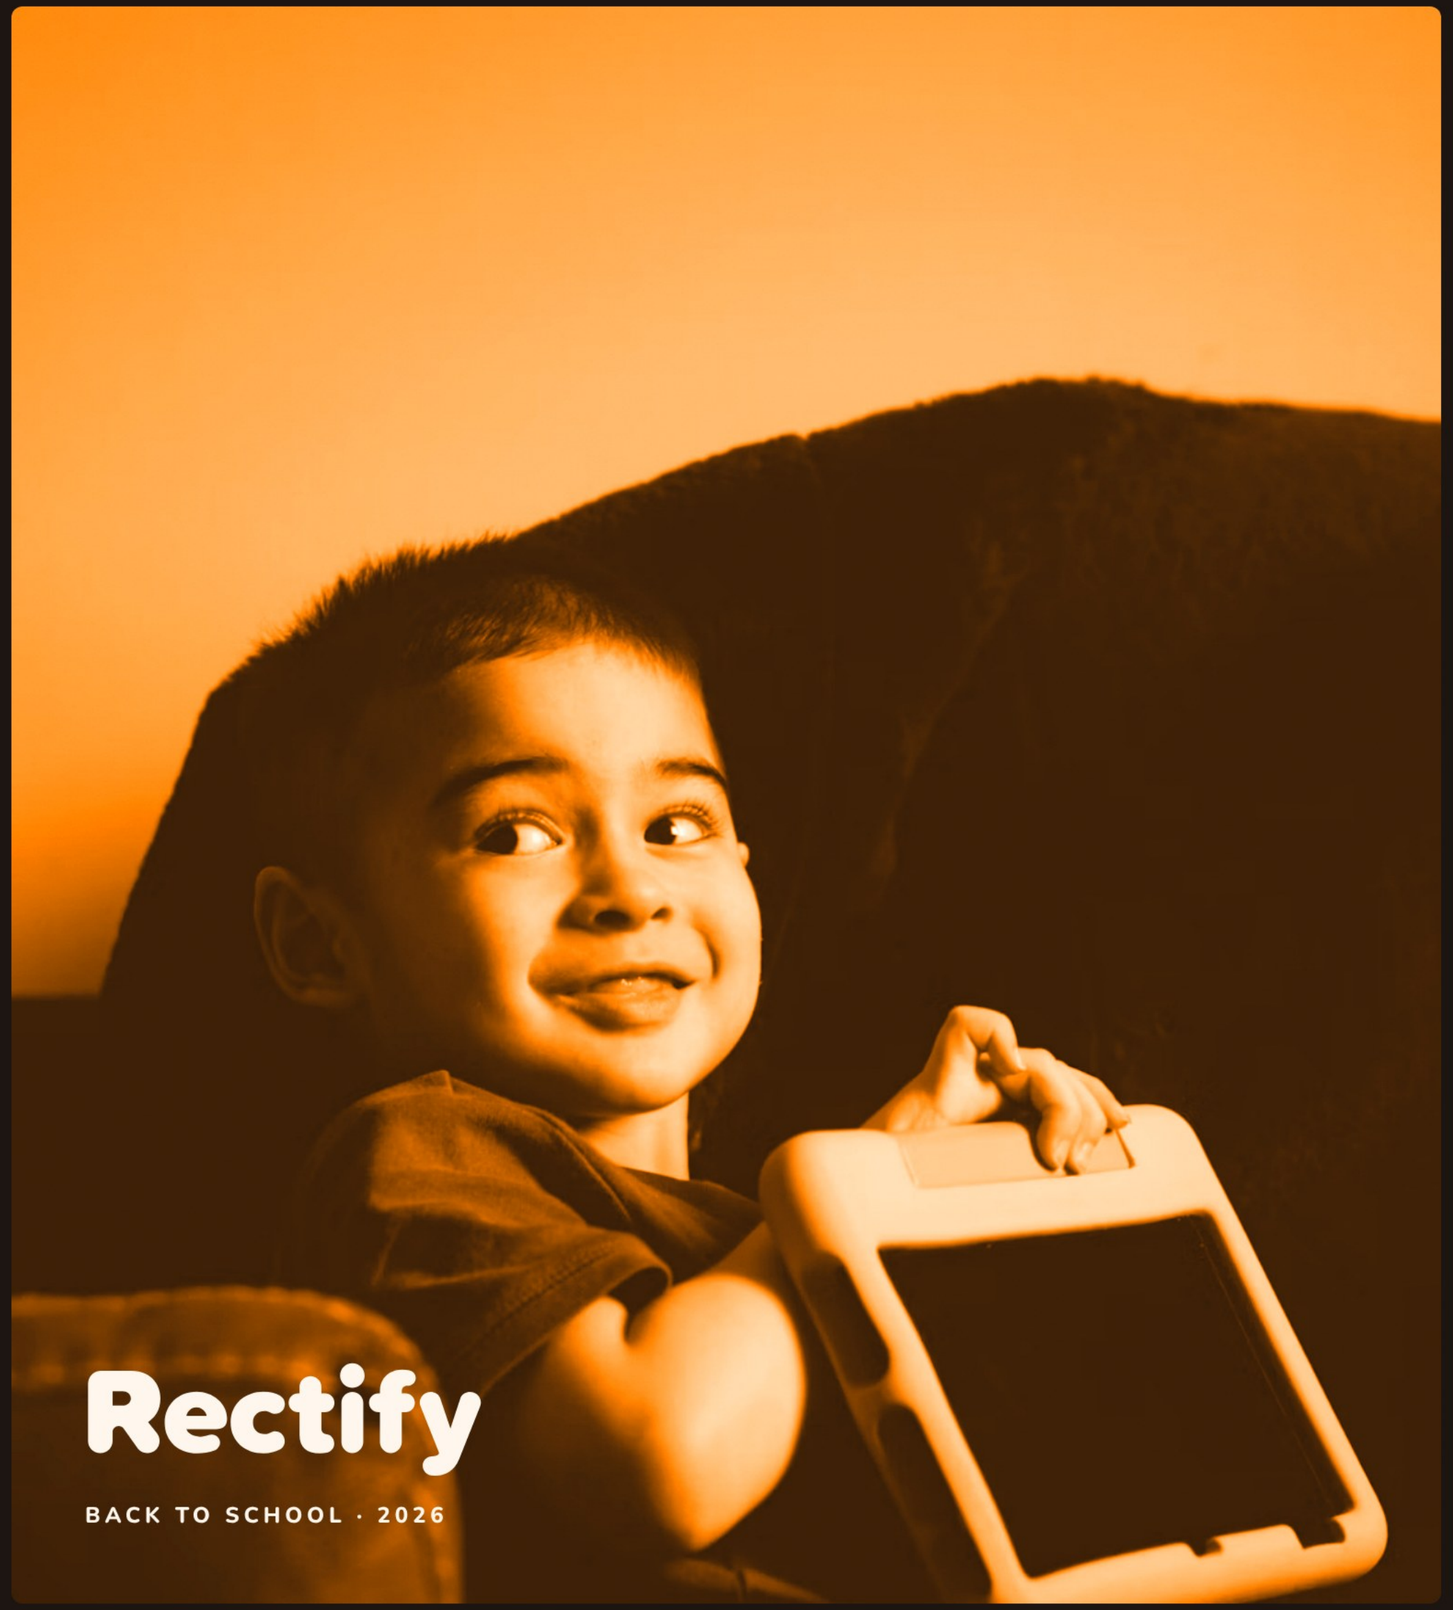

- ✕ Posed stock smiles
- ✕ Cold blue screen glow
- ✕ Busy, cluttered frames
- ✕ Kids as props for adults

Before

Rectify grade

GRADING RECIPE

Temperature	+8 warm
Contrast	+6
Blacks	lifted to Ink #231A15
Highlights	soft, orange tint
Grain	10%, fine

CAMPAIGN TREATMENT

Tritone: Ink, Orange, Cream.

For posters, events and big outdoor formats. It unifies photos from any source into one Rectify look.

NEW: THE ZOOM

Fade the scene.
Zoom the detail.

The photo dims and one detail is magnified in full color:
the thing this lesson is about.

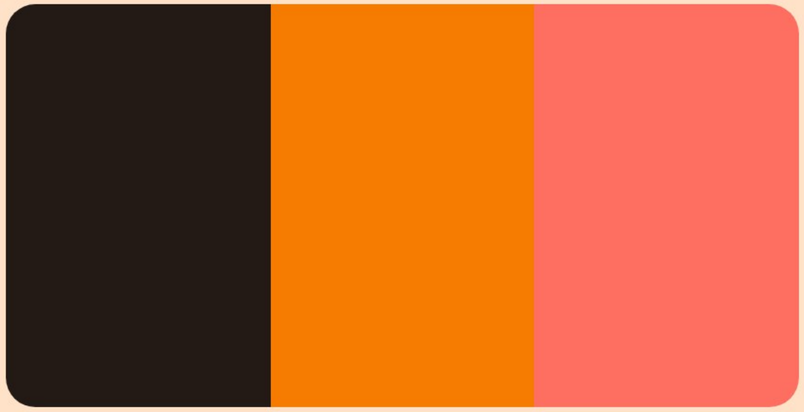

ART DIRECTION

Warm. Curious. Honest.

LAYOUT SYSTEM

Corner. Lens. Line.

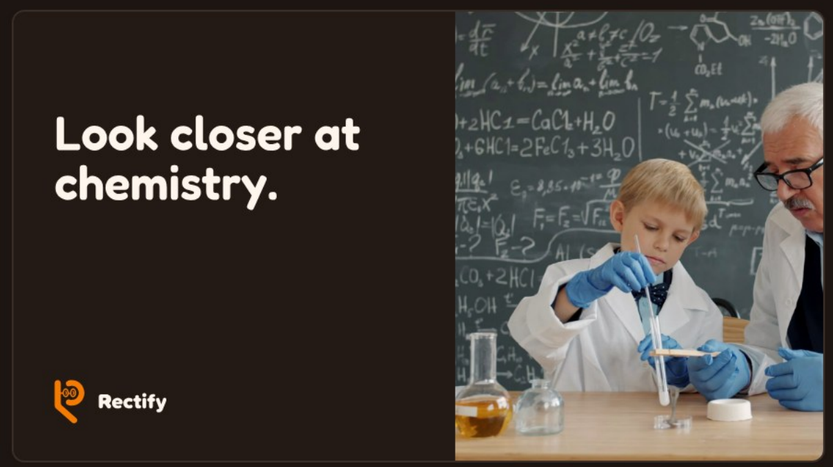

Logo in a corner at one margin. One Lens or Zoom per layout. The headline sits on the eye line, the top third, where the logo's glasses sit.

Poster · headline on the eye line, one Lens, logo bottom-left

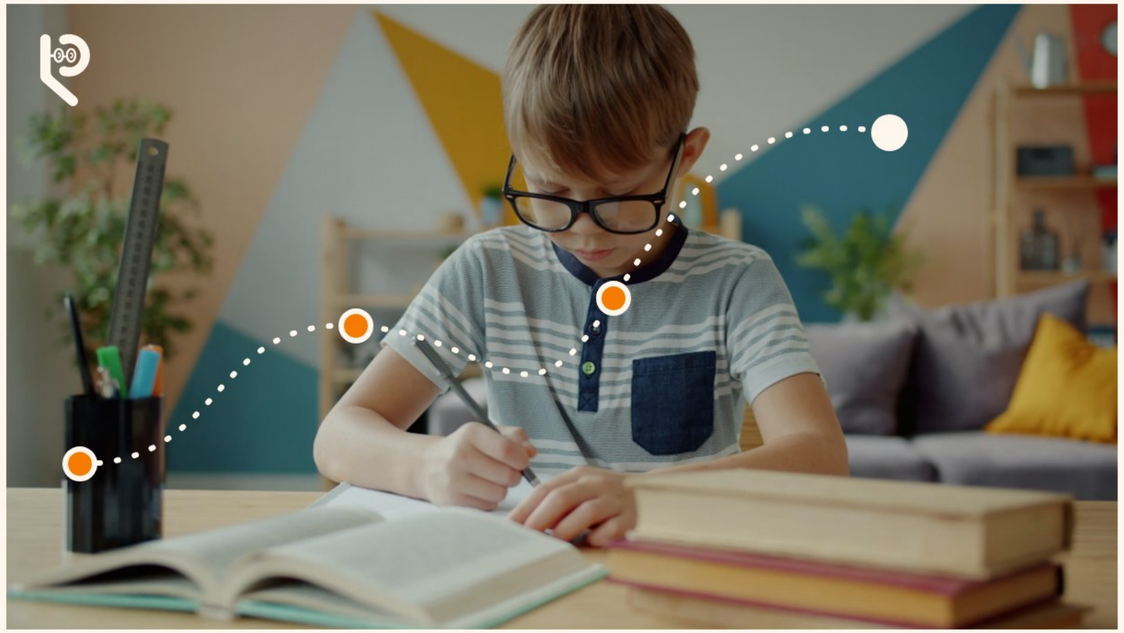

Story · symbol top-left, photo in a rounded Lens

Web banner · horizontal lockup bottom-left, photo right

19 October 2026

Dear Ms. Ben Salah,

Thank you for joining Rectify. We build short, playful video lessons and activities that help children explore math, language and science at their own pace. This letter confirms your school's partnership for the new term.

Our team will share the onboarding kit, teacher accounts and a short training session over the coming weeks. If anything is unclear, we are one message away.

We can't wait to see what your students discover.

Warm regards,

Bassem Bouazizi
